ABOUT ME

I am passionate about Natural Language Processing and Artificial Intelligence, with a focus on advancing the formal methods in language understanding and generation. My research interests lie at the intersection of deep learning and computational linguistics, exploring how machines can better comprehend and produce human language.

EDUCATION AND TRAINING

01/07/2021 – 31/08/2025 Pokhara, Nepal
BACHELOR OF COMPUTER ENGINEERING Pokhara University

Artificial Intelligence | Natural Language Processing | Data Mining | Probability and Statistics

Final grade 3.64/4.0

PUBLICATIONS

2025
[Integrating Automatic Speech Recognition and Emotion Detection: A Conformer-XGBoost Framework for Human-Centered Systems](#)

Journal Name: Journal of Artificial Intelligence and Capsule Networks (jaicn)

2026
[Abstractive Summarization of News Articles Using BART \(under review\)](#)

Journal Name: POKHARA ENGINEERING COLLEGE JOURNAL (pecj)

WORK EXPERIENCE

JUNIOR MACHINE LEARNING ENGINEER – BICHITRAS GROUP – 03/07/2024 – 02/09/2025 – LALITPUR, NEPAL

- Developed chat analysis and spam detection models for live-streaming moderation in romanized Nepali text using fine-tuned XLM-RoBERTa and HuggingFace Transformers
- Developed modules for live engagement and performance analysis including time series forecasting using LSTM and viewer behavior classification using XGBoost with pandas, and PyTorch
- Designed backend APIs for the live streaming app using FastAPI.

PYTHON DEVELOPER INTERN – IDEA2MVP – 12/02/2024 – 14/05/2024 – LALITPUR, NEPAL

- Contributed to backend development using Django and PostgreSQL
- Integrated Generative AI capabilities into existing product pipelines with LangChain and OpenAI's (chat and whisper) APIs.
- Developed automation scripts to streamline internal workflows using selenium and celery.

CONFERENCES AND SEMINARS

13/11/2025 – 14/11/2025 Pokhara, Nepal
The International Conference on Emerging Trends in Engineering and Technology (ICET 2025)

Presented a paper on "Abstractive Summarization of News Articles Using BART"

Link <https://www.pec.edu.np/conference>

HONOURS AND AWARDS

Merit Based Scholarship – Gandaki College of Engineering and Science

2024

Winner - Coding Competition – IT Expo 2024 - Gandaki College of Engineering and Science

● FELLOWSHIPS

2024

Fuse AI Fellowship

● PROJECTS

Automatic Speech Recognition and Speech Emotion Detection using Conformer-XGBoost

Link <https://github.com/kayceem/Automatic-Speech-Recognition>

In-Browser Proctoring AI using YOLOv8, DeepFace, Gaze Tracking

Link <https://github.com/kayceem/in-browser-proctoring-ai>

Fine-Tuning BART for News Summarization

Link <https://github.com/kayceem/News-Summarization>

Face Emotion Detection using YOLOv8

Link <https://github.com/kayceem/face-emotion-detection>

RAG-based Customer Support System

Link <https://github.com/kayceem/customer-support-be.git>

Diabetes and Pneumonia Prediction using RandomForest and RNNs

Link <https://github.com/kayceem/MediScan.git>

● SKILLS

Machine Learning

PyTorch | TensorFlow | HuggingFace | scikit-learn | pandas | numpy | LangChain | RAG | LLMs | NLP

Programming

Python | C | C++ | JavaScript | Bash | PowerShell | Rust

Tools & Technologies

Git | Docker | Kubernetes | ML Flow | GitHub Actions | Selenium | Playwright | n8n | Azure | AWS
